

HOME LEARNING

Subject: Craft

Time to complete: 1 hour

Learning Objective: To research and learn about the process of surface relief

Our next module in Craft is all about Surface Relief. This is a type of artistic process that you will have seen before even though you may not have heard of the term. We will be creating our own surface reliefs using card, clay and Styrofoam in school however, I would like you to research the topic before we start.

Task: research

Use the internet to research surface relief. Can you find 5 different examples? What is the oldest example of surface relief you can find?

Research the following types of surface relief. Find an image and write an explanation for each:

Surface Relief	Image	Explanation
Styrofoam printing		
Hieroglyphic Writing		
Egyptian Alphabet		
African Masks		

Save your work:

If you are using a computer, open a blank document to do your work (you can use Word or Publisher). Don't forget to SAVE it with your name, the lesson you are doing and the date.

For example: T.Smith Maths 8 April

If you would like us to see or mark your work please email it or send a photo of your completed work to me at mcorcoran@glebe.bromley.sch.uk

Thank you
