

HOME LEARNING

Subject: Science

Time: 50 minutes approx.

Learning Objective: I can identify teeth and their functions

Task 1: (Miss Latchem and Mr Larrive)

I can classify animals according to their teeth

Watch the video 'Teeth – how they help animals eat' on the following link

<https://www.bbc.co.uk/teach/class-clips-video/science-ks2-teeth-how-they-help-animals-eat/zr8ygwX>

Now read the information about different types of teeth on the following webpage

<https://www.dkfindout.com/uk/animals-and-nature/food-chains/types-teeth/>

Use what you have found out to sort the following animal skulls. Look closely at their teeth and then see if you can identify whether they are carnivores, herbivores or omnivores. You can cut out and stick each picture or you can just list them if that is easier.

Carnivores

Eat only animals

Omnivores

Eat animals and plants

Herbivores

Eat plants

House cat

Beaver

Deer

Dog

Bear

Boa constrictor

Alligator

Goat

Wolf

Pig

Hamster

Save your work:

If you are using a computer, open a blank document to do your work (you can use Word or Publisher). Don't forget to SAVE it with your name, the lesson you are doing and the date.

For example: T.Smith Maths 8 April

If you would like us to see or mark your work please email it or send a photo of your completed work to:
